LinkedIn Id: https://www.linkedin.com/in/sourav-banerjee-50b443106/
GitHub Id: https://github.com/Sourav692

I am Azure Big Data Engineer with strong background in Big Data Analytics, ETL, Data Analytics and Azure Cloud Platform. I have Proven track record of 8+ years in diverse facets of software development, Design, and execution of business applications. I have extensive experience on Big Processing pipeline Design, Data Lake Design, Cloud Migration, Data Quality and Data Management. I have working knowledge on Data Mining, Machine Learning and Data Science.

Key Skills

~ Big Data Analytics and Cloud

~ Project Execution

~ Requirement Gathering

~ Stakeholder Management

~ Customer Engagement

~ Machine Learning

~ Change Requests

~ Relationship Management

~ Reporting & Documentation

~ Liaison & Coordination

Profile Summary

- **6+ years of experience** in Big Data Analytics and Cloud platform like **Azure**, **AWS** and across IT & Service domain.
- Hands-on experience in **managing Development Lifecycle** right from coding to testing (preparation of test cases along with implementation) to maintenance of proposed applications using continuous delivery model
- Excellence in **mapping business requirements** and translating them into functional specifications, use cases, services, implementations & custom designing solutions by identifying business benefits & impact and following the standard guidelines
- Rich experience of working in DevOps environment for Big Data by using different tools like **Jira, Bit Bucket, Jenkins & Confluence, Docker.**
- Gained exposure of working on **Cloudera Data Platform, Apache Hadoop, Apache Spark, Hive, PySpark, Oozie, HDFS, Data Analytics, Python, Scala, Apache Technologies.**
- Efficiently worked on **POC to evaluate different Hadoop architecture** and Spark streaming with Kafka.
- Machine Learning model creation for **Forecasting, Clustering, Regression** and **Classification.**
- Running **complex SQL queries** for Data Analytics.
- Experience in Creating **Design document** and **Architectural Document** (HLD/LLD).
- Efficient organizer, motivator, team player and a decisive leader with the skills to motivate teams to excel & win.

IT Skills

- **Big Data Analytics:** Apache Hadoop, Apache Oozie, Hive, HDFS, Kafka and Sqoop, Airflow.
- **Machine Learning:** Linear Regression, Naïve Bayes, Logistic Regression, Decision Trees and KNN, NLP
- **Spark/PySpark:** Spark Core, Spark SQL, RDD and Spark ML
- **Azure Cloud:** Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Azure Function, Azure Datalake, Azure App Service, Azure Webapp, Azure Cognitive Service, Azure VM etc.
- **Cloud Platforms:** AWS and Azure
- **Deep Learning:** Computer Vision, Keras.
- **NoSQL Database:** MongoDB, Cassandra, HBase
- **Data Science**: NumPy, Pandas, Seaborn, Matplotlib, Scikit Learn
- **DevOps / Continuous Integration:** Jira, Bit Bucket, Jenkins and Confluence, GitHub, Gitlab
- **Languages:** Python, Scala, R(Basic),
- **Environment:** Linux and Windows 10/7, Guardian
- **Database:** Oracle and MySQL, MsSql, Snowflake

TOOLS

- **Developer Tools:** Jupyter, Putty, WinSCP, RoboMongo, MongoDB Compass, Beyond Compare, STORQM, NOTEPAD++, MS Excel, Ultra Edit, Expeditor, VMWARE.
- **IDE:** Eclipse, IntelliJ, VS Code, Spyder, Anaconda, PyCharm, Atom.
- **Visualization Tool:** Power BI(Basic)

CERTIFICATION

- Microsoft Certified Azure Fundamentals.
- Microsoft Certified Azure Data Engineer.
- Microsoft Certified AI Fundamental
- Master Program Certification for Data Science
- IBM – Python for Data Science
- Coursera: Machine Learning Specialization

ORGANISATIONAL EXPERIENCE

Mar 18 -present **Accenture Applied Intelligence as Cloud Data Engineer**

Projects Undertaken:
Client: Multinational banking and financial services corporation.
Role: ETL Lead
Technology Azure Data Platform and Apache Spark

Responsibility:

- Working as Tech lead managing a team of 10 Data Engineer.
- Creating Azure Data Factory Pipeline for ingestion and processing of data
- Contributed in gathering requirements from the client
- Pre-Processing and processing of Data using Azure Databricks using PySpark and Python pandas.
- Insert Processed Data using Azure Databricks and Azure Data Factory into Azure SQL DW.
- Work on Synapse for data loading and SPARK pool of Synapse Analytics.
- Create views in the Azure SQL DW which are used in Power BI.
- Worked in POC for different Analytics Use case for Machine learning and other.
- Worked in Creating Power BI chart for end users.
- Exploring Data sets which can we used for Analytics.

Client: Patented ETL and Machine Learning Automation Product of Accenture (Internal Project)
Role: Product Lead
Technology: Azure Cloud Platform, Big Data Analytics, NLP, Machine Learning, Cognitive Services

Responsibility:

- Work as a Lead Data Engineer who will be designing and implementing end to end data solutions to solve complex business problems
- As technology consultant provide valuable data insights to customer and help them to improve their business effectiveness.
- Involve in customer interactions to understand their business problems and provide best in class data solutions
- Perform data analysis, design ETL architecture, data modeling and implementing robust data pipelines
- Use Azure Machine Learning model for real time and batch inference.
- Implement Azure Cognitive Service for different AI solution.
- Work on Synapse for data loading and SPARK pool of Synapse Analytics
- Create PySpark script to automate the ETL process.
- Create Stored Proc, SQL function in Azure SQL.

Projects Undertaken:
Client: American multinational enterprise information technology company.
Role: Lead Big Data Engineer
Technology: Hortonworks, PySpark, Spark-Scala, MongoDB

Responsibility:
- Working as lead big data engineer working in Hortonworks platform.
- Creation of MongoDB collection and ingesting data in Collection.
- As part of BA team create Design Work Flow (HLD/LLD).

Projects Undertaken:
Client: Publicly-owned corporation of the Australian Government
Role: AWS Data Engineer
Technology: PySpark, Big Data and AWS, Cassandra

Responsibility:
- Working as lead big data engineer working in Hortonworks platform.
- Creation of MongoDB collection and ingesting data in Collection.
- As part of BA team create Design Work Flow (HLD/LLD).
- Extract the data from Oracle Golden Gate and store in Kafka Topic.
- Using Datastax Cassandra get the data from Kafka and apply Spark SQL Transformation in the data and make the data ready for Tableau Visualization.
- For Phase 2 read the data from AWS S3 bucket and have done spark transformation on the file.
- Configure EMR cluster to deploy the Spark Job and deploy the AWS Lambda function for scheduling job in AWS.
- Ingestion of the data in AWS Athena for further filtering and Analysis.
- Create Jenkins Pipeline for deployment of the code.

Projects Undertaken:
Client: Indian nationalized banking and financial services company
Role: Big Data Engineer
Technology: Hortonworks, PySpark, Spark-Scala, MongoDB

Responsibility:
- Working as lead big data engineer working in Hortonworks platform.
- As a Data Engineer we must build Kafka Streaming Pipeline using Cassandra that would take data from Oracle Database and feed it to Cassandra.
- Have developed Kafka Streaming to Cassandra and the PySpark and Scala-Spark job to transform the data as per the required format.
- Create Staging Layer and Raw Layer as per the ETL Process.
- Create Big Data Environment for the Process.
- Create Encryption Logic for Customer Data using hive UDF(JAVA).

Since Oct'16-Mar 18 **Mashreq Global Services as Big Data Engineer**

Project Undertaken:
Title: Supply Chain & HR Analytics COE
Role: Big Data Engineer
Technology: Scala, Spark, Hadoop, PySpark, SQL

Responsibility:
- Developing Big Data Platform using Stg -> Trans -> Hub Layered Architecture on Supply Chain
- Working on:
  - Different module of Supply Chain and creating Spark Jobs & Hive Scripts for Inventory, Purchase Order, Work in Process Modules, and so on
  - Automation of Hive Scripts using PySpark
  - Oozie Workflows & Oozie Coordinators
  - Survey Data Analysis by using Spark, Hive HR Domain
  - Replacement of Kinaxis and implementation of Oracle Cloud Planning

- Migration of Race and implementation of Oracle Cloud Planning in Big Data Platform
- Data grooming in spark

- Creating Data Repository which will help in Machine Learning and Reporting Purpose
- Acted as a member of a team working in automating the end-to-end process of data lifecycle across the layered architecture
- Using Spark & Hive for transformation and working on Hortonworks Data Platform for the same
- Collaborating with Business Users for the Requirement Gathering
- Preparing model for the classification problem, data gathering, cleaning, validation, quality, exploratory data analysis, missing value and outlier treatment
- Performing data pre-processing using NLTK (Natural Language Toolkit)
- Contributing in requirement analysis and solution discussion

Projects Undertaken:

Client: Master Customer Data Analytics
Role: Developer
Technology: PySpark, Machine Learning, Hadoop

Responsibility:

- Working as lead developer working in Hortonworks platform.
- As part of the team, I was involved in implementing Clustering Model and Classification model using Python (KMeans Cluster, SVM and Logistic Regression)
- Create DeDup functionality using Python for CDM data.
- Write Python Script for different Automation Job.
- Deploy the code using Jenkins Pipeline.

Since Oct'12 – Oct'16 Tata Consultancy Services as System Engineer

Projects Undertaken:

Title: Dutch multinational banking and financial services corporation
Role: System Engineer
Technology: Key objective of project was to implement Big Data Analysis for internal product and work on Real-time Analytics using Spark, Kafka, HBase, Hadoop.

Responsibility:

- Analyzed log data from different sockets & files and provided insights about the risk associated with the user
- Developed Hive scripts for end user / analyst requirements to perform ad hoc analysis
- Solved performance issues in Hive with understanding of Joins, Group and aggregation and how does it translate to Map Reduce jobs.
- Developed simple to complex Spark jobs using Scala; contributed in the requirement and analysis phase
- Managed the importing of data from various data sources; performed transformations using Spark, Hive & Map Reduce
- Engaged in collecting the data from different data sources using SQOOP
- Migrated Map Reduce jobs to Spark
- Wrote Hive queries to analyses data in Hive Warehouse using Hive Query Language (HQL)
- Developed Hive and Spark SQL for the business logic
- Transformed structured data using Dataframe and HiveQL

Academic Detail

2012 **B.Tech. (ECE)** from Asansol Engineering College, West Bengal, India

Personal Details

Date of Birth: 14th March 1991
Languages Known: English, Hindi, Bengali
Nationality: Indian
